PROJECTS

[Free premium Courses ↗](#)   **[Modern to-do app ↗](#)**
Aug 2024 - Oct 2024   Sep 2024

This website is made By using Next.js . I can proudly Say that i create a premium website with full responsiveness By Next.js In backend I mongodb as Database. In this i create Authentication process with separate user and admin. I create authenticated route . many more thing like search bar many more. Please you can check my website it is deploy by vercel.

Modern to do app with pagination and search bar. (Tip:- Dark mode not available)

[Auth with supabase ↗](#)   **[Chat GPT clone ↗](#)**
Sep 2024   Aug 2024

                                                 I can't provide you link of this project Sorry for that. because of in this i created two server client and backend. I have not subscription of like hostinger or any other platform which host both at one place . Due to this i host only backend on render.

Natours tours app With Node js ↗
Jun 2024 - Jul 2024

I create a natours app for booking tours. In this website user can login signup and see multiple tours. also user can track upcoming or recent tours . which is book by user. You can also receive welcome and forgot password main to your mail account. User can also do payment with credit card. I use Stripe for payment interfaces.

Adventurer Tours Booking ↗
May 2024

I create a Static website with full responsiveness. This website show some interesting and Adventurer Tour. i use advance and latest feature of css in this website. i Scss insted of css. you can check my website . Remember it is only static website now.
